We oppose the US Commerce Department's decision to add another 46 Huawei affiliates to the Entity List. It's clear that this decision, made at this particular time, is politically motivated and has nothing to do with national security. These actions violate the basic principles of free market competition. They are in no one's interests, including US companies. Attempts to suppress Huawei's business won't help the United States achieve technological leadership. We call on the US government to put an end to this unjust treatment and remove Huawei from the Entity List.

The extension of the Temporary General License does not change the fact that Huawei has been treated unjustly. Today's decision won't have a substantial impact on Huawei's business either way. We will continue to focus on developing the best possible products and providing the best possible services to our customers around the world.
